

# Product Backlog Refinement

## CHEAT SHEET

### Inputs:

- Planning pre-work
- Context scenario drafts
- Design hypothesis drafts

### Goals:

- Refine context scenarios
- Discuss domain model updates
- Refine the design hypothesis

### Outputs:

- Context scenarios documented in Confluence
- Domain model updates reflected in Confluence

### Questions to ask yourself:

- Is the context scenario core to our next milestone?
- Does the context scenario solve the user's needs?
- Do the context scenario personas match my expectations?
- Is there important detail missing in the context scenario?
- Are additional context scenarios missing?

### Try to avoid:

- Technical implementation details
- User Interaction / User Experience design details
- Steering discussion toward other milestones

### Where are we in the pipeline?
